ANTONY GOBRIEL

PhD Candidate in Economics — Economic History of Migration and Demography
IÉSEG School of Management — UMR 9221 – LEM, CNRS · University of Lille
a.gobriel@ieseg.fr — Website — LinkedIn

FIELDS OF INTEREST

International Migration (F22), Economic History (N33), Labor Economics (J21, J24)

EDUCATION

PhD in Economics 2024 – 2027 (Expected)
Université de Lille - IÉSEG School of Management
Focus: Family Economics, Migration, and Applied Econometrics.

Master 2: Politiques Publiques 2024
Université Paris 1 Panthéon-Sorbonne
Thesis: *Assessing the Altruistic Hypothesis: Social Policy's Impact on Remittances among Egyptian Migrants.*

Master 1: Development Economics 2023
Université Paris 1 Panthéon-Sorbonne
Thesis: *The Impact of GVC Participation on Firm Performance in the MENA region during the Pandemic.*

Double Bachelor Degree in Economics 2023
Université Paris 1 Panthéon-Sorbonne & Cairo University

PSE Summer School 2025
Paris School of Economics

WORKING PAPERS

The Impact of WWI on Migration Flows and Migrant Integration in France **Job Market Paper**

Abstract: With 1.4 million deaths and 1.1 million severely wounded soldiers, World War I cost France more than 10% of its labor force. This paper investigates how migration acted as a buffer against the resulting localized imbalances in the labor and marriage markets. I construct a novel department-level panel covering 1900–1936, combining historical French census reports with micro-level genealogical records that track individual migration trajectories and integration. Using a difference-in-differences design with a continuous treatment, the military casualty rate of each department, I estimate the causal effect of missing men on the volume and composition of both internal and international migration flows. Beyond aggregate flows, I examine migrants' economic and social assimilation through sectoral labor market participation, intermarriage rates, and cultural integration proxied by children's naming patterns.

The Rise of International Migration: Evidence from Genealogical Data Work in Progress, 2026
with Simone Moriconi and Riccardo Turati

Abstract: Research on the drivers of historical European migration has been constrained by the scarcity of longitudinal data. Unlike traditional census records, which provide cross-sectional snapshots, genealogical data enable the continuous tracking of individuals across their entire life cycles and geographical trajectories. Leveraging a novel genealogical dataset covering 1700–1940, which we validate against census records from the United States, Canada, the United Kingdom, France, Norway, and Sweden, we estimate a gravity model to identify the determinants of the largest intra-European and transatlantic migration flows between Europe, the United States, and Canada. We measure the role of historical economic, political, and cultural distance between origins and destinations.

RESEARCH VISITS

French Ministry of Interior Oct. – Dec. 2026
Visiting Researcher

Aix-Marseille School of Economics (AMSE) Oct. 2026
Visiting Researcher

PRESENTATIONS & Discussions

Presentations

Virtual Workshop on French Economic History. Oct. 2026
Presenter

LEM Real Flows Seminar Oct. 2026
Presenter

FaMiGrowth Research Webinar Jan. 2026
Organizer and Presenter

LEM PhD Day Université de Lille - LEM (UMR 9221) Jan. 2025
Topic: Early-stage research on historical migration flows.

Discussions

LEM Doctoral Seminar Feb. 2026
Discussant for "Drowning assets? The impact of floods on real estate" (Fajeau et al.).

Long-Run Dynamics in Economics (LORDE) April. 2026
Discussant for "The Roman roots of the Western European trade linkages" (de Pierpont de Burnot. C).

RESEARCH EXPERIENCE

French Ministry of Interior 2022
Development of an Atlas for Migrants integration on the departmental level
Analyzing the impact of downgrading on the integration process of immigrants

Egyptian Competition Authority 2022
Development of a market neutrality index
Report on the developments in digital economy competition law.

Researcher 2021
Cairo Center for Development Benchmarking
Quantitatively evaluated a World Bank project impacts and designed survey protocols.

SKILLS & Academic activities

Technical Skills

Software: RStudio (Advanced), Stata (Advanced), Python (intermediate), Microsoft Office Suite.
Languages: Arabic (Native), French (C2), English (C2), Spanish (B1).

Academic Activities

- **Microeconomics Undergraduate Course** (2024 – Present).
- **IFlame seminar organizer** (2024 – Present).
- **PhD Students representative** (2026 – Present).
